

Course curriculum for advanced zoom classes

This is a brief overview of what we will be covering in the **advanced zoom classes**. Every class builds upon the other. Throughout the classes, before we dive into a new sound, we will review the previous sound learned as well as any high frequency words and texts taught. Students will be participating at all times as there will be activities to do throughout the classes. Some of these activities include making sound and word cards, reading texts together, highlighting and breaking up words, as well as doing mini 'dictées' (spelling tests) on the whiteboards.

***Please note that the class lessons can vary depending on the learners in the class. I like to keep my classes flexible and personalized so if we need to spend more time on a sound, we will. If I see the students ready for the next sound, we will dive into it faster.
